

ApexPlanet Data Analytics Internship

Portfolio Summary

Candidate

Saravana Kumar

Overview

Successfully completed the ApexPlanet 60-Day Data Analytics Internship by delivering five progressive tasks covering the complete data analytics lifecycle.

Task 1

Data immersion, cleaning, transformation, feature engineering, and creation of an analysis-ready dataset.

Task 2

Exploratory data analysis, descriptive statistics, visualizations, SQL-based business insights, and reporting.

Task 3

Deep-dive business analysis, KPI definition, customer segmentation, and dashboard development.

Task 4

Business storytelling, KPI reporting, visualizations, and hypothesis testing using statistical methods.

Task 5

Integrated all internship deliverables into a professional GitHub portfolio with documentation.

Technical Skills

Python, Pandas, NumPy, Matplotlib, SciPy, SQL, Excel, Git, GitHub, Data Visualization, Dashboarding, Statistical Analysis.

Key Learning Outcomes

Strengthened practical skills in data cleaning, analysis, visualization, business intelligence, storytelling, statistical validation, and version control.

Conclusion

This portfolio demonstrates an end-to-end data analytics workflow from raw data to actionable business insights.
